## INFORMATION

We are offering the present price-list No. 11 for the season fall 1920 and spring of 1921, and solicit your early orders for anything you may require in dependable nursery stock. Prices herein cancel all former lists. No descriptive catalog will be issued this season, but we will send on request copy of former issue, giving full descriptions of all stock.

**PLACE YOUR ORDERS EARLY**—Last season we were unable to fill all orders received, owing to inadequate help and the unprecedented demand, and early placed orders of course will be filled first. Owing to Federal Prohibition of importation of nursery stock, the supply in the entire United States is short and it will require several years growing before the American nurseries can take care of the normal demand.

Our business was established in 1887 and for the past 33 years we have been **growers**, not merely **dealers**, of hardy fruit and berry stocks, but specialize in fine ornamental trees and shrubbery. We are practical horticulturists and glad to assist with advice concerning commercial fruit plantings as well as assist in home improvement.

**LOCATION**—General office, packing and sales department are in Portland, corner Second and Main streets. Nurseries are at Durham, 11 miles south of the city. All inquiries should be addressed to the Portland office.

During planting season a general stock is carried at the city yards and replenished by daily truck service from the nursery. Visitors are welcome at all times to yards or nurseries.

**PLANTING SEASON**—Stock should not be planted until dormant in the fall nor after growth starts in the spring. Under ordinary weather conditions digging and shipping season commences in mid-October and continues until early April. Early fall planting is preferable as a rule, as roots form during the mild winters and plants are ready to grow when warm weather begins. Early spring planting is also perfectly satisfactory.

**PRICES AND DELIVERY**—It is my aim and intention to give good value to all purchasers. Prices in this catalog are net for stock f. o. b. Portland or nursery shipping station. Unknown correspondents should send cash with their order or arrange for terms.

**GUARANTEE**—I guarantee that all plants sent out will be delivered to the carrier in first-class condition and they shall be true to name and if through error any should prove untrue to replace them without charge. It is obvious that I cannot guarantee that customers will make them live, as I have no control over conditions surrounding them and the care they will receive after they leave my hands.

**LANDSCAPE DEPARTMENT**—Best results are attained in landscape and other gardening work when both experience and taste work together. Our Landscape Department is under well equipped and expert management. We are always glad to offer **suggestions without charge** to intending purchasers, but where landscape problems require special visits, plans, specifications, etc., a charge is made consistent with value of services rendered. We will be pleased to take up this matter more fully with those who are interested.

BLOSSOM TIME IN AN OREGON ORCHARD HOME

**FRUITS****APPLES**

	Each	Per 100
One year, 4-6 ft.....	\$0.75	\$60.00

12 Champion Gooseberry	6 Blackcaps
12 Red Raspberry	6 Loganberry

Delivered prepaid, express office, as above.....\$12.00

NURSERY VIEW—NORWAY MAPLES

## DECIDUOUS ORNAMENTAL TREES

As ornamental subjects, trees take first place, as they are permanent, easy to cultivate and care for and cost far less than shrubbery or plants in the long run.

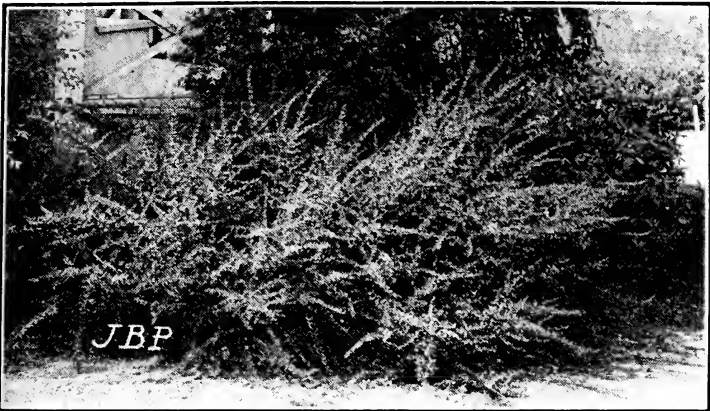

The following list of deciduous trees (those that lose their leaves in autumn) embraces a selection for all purposes. For street planting, the Norway Maple probably leads in general suitability, with several other varieties of Maples, Elms, Birches, Horse Chestnuts, Tulips, Mountain Ash and others, all favorites; while for lawn and park planting this varied list covers trees of every characteristic in outline and habit, color of foliage and floral diversity.

These trees have been grown from seedlings in my nursery, have been transplanted each a number of times, according to size, will transplant readily and take vigorous hold and grow well when moved to permanent locations. Prices are for different sized trees, and in all cases good value will be given, according to price charged.

WILSON'S BARBERRY—A FINE SHRUB

DECIDUOUS ORNAMENTAL SHRUBS

Flowering shrubs take predominance in all plans for landscape decoration, grounds large or small. Without shrubbery no landscape can be created, but with a careful selection, properly planted, any property can be enhanced in beauty and value. If care is given in selecting, flowers can be had from early Spring to late Fall. It is my aim to produce everything in flowering shrubbery that is useful, hardy, and worthy of cultivation in this climate. I have been bringing in, trying out and rejecting different shrubs for many years past, adding to my list only those of proven merit in the Pacific Northwest. My stock is large, well grown, every plant being bushy and well furnished in proportion to its height and with exceptionally fine root system. Where no sizes are quoted, prices are for large, well grown shrubs, that will give immediate effect and flower the first year after planting.

Japan Maple (Acer Palmatum)—	Size in.	Each.

We carry a splendid assortment of these in stock at all times, ranging in price from \$3.00 to \$10.00 each. See them at the Sales Yard, or write for List.

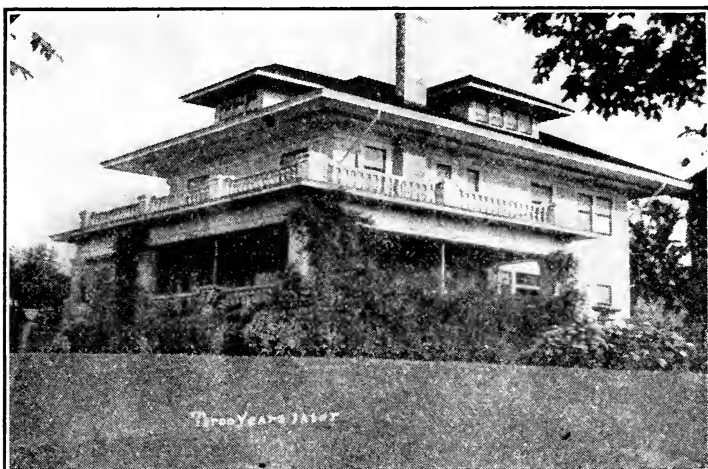

PORTLAND RESIDENCE, BEFORE PLANTING. A PICTURE  
WITHOUT A FRAME

The great beauty of the broad leaved evergreens, makes them most valuable for gardening purposes. Many are among our most spectacular and gorgeous flowering shrubs, while their broad, attractive leaves show out most effectively during the parts of the year when many trees and plants are without foliage. There is practically no end to the charming results that can be obtained by the liberal use of this class of plants.

## BROAD LEAVED EVERGREEN TREES AND SHRUBS

<b>Abelia Rupestris</b> , pink tinged.....	18-24	\$1.00

**SPIREA THUNBERGI**

### **CONIFERS—EVERGREEN TREES**

Always dug with ball of earth and burlapped. We transplant and root prune them frequently, which practically insures successful transplanting, even of the larger specimens of which we have a limited number of large size specimens from 4 to 8 feet high in *Abies Balsamea*, *Cicilica*, *Concolor* and *Nordmanniana*; *Lawson's Cypress*; *White, Englemann's*, *Norway* and *Colorado Blue Spruces*; *Austrian* and *White Pine*, and *Redwood*, and will gladly make special quotation upon any in which you may be interested.

ROSE MARIE

BETTY

## ROSES

### Strong Field Grown Two-Year-Old Plants That Give Results

Abbreviations used in descriptions are: H. P., Hybrid Perpetual—vigorous, hardy, flowering in Spring and Fall; require less care and attention than other classes. H. T., Hybrid Tea—more vigorous in growth, free flowering, fine colors; the most satisfactory class for the Pacific Northwest. T., Tea or Everblooming—less vigorous, more tender, finest of flowers. Poly., Polyanthus—fine class of small flowered climbers or pillar roses. Noi., Noisette—rather tender climbers, flowers usually in clusters. G. M., Gold Medal—the Highest Award of Merit given by the National Rose Society of England.

These plants are too large for mailing unless severely cut back, though they can be sent this way if desired, in which case add 10 cents for single plants for postage; 30 cents for six, and 50 cents per dozen. We pack securely for shipment by express anywhere without extra charge, purchaser paying express charges, which are very light on nursery stock of all kinds.

### Late Introductions — Novelties

	Each
Miss Lolita Armour, a most wonderful rose from the originator of Los Angeles. Full double flower, chrome yellow base, shading orange and copper. Strong two year plants.....	\$2.50
